**MODULE 2 Laboratory Safety.** This training will cover multiple aspects of laboratory safety, including identification of the most common routes of chemical exposure and identification of common hazards found in a laboratory environment, proper handling, storage and disposal methods of hazardous chemicals, and identification of control methods that reduce chemical exposure. In addition, you will learn how to respond to various emergencies such as exposure, spills and fire, and how to recognize hazards. You will learn housekeeping and storage practices and how to protect yourself through the proper use Personal Protective Equipment (or PPE) and emergency safety equipment.

**Training needs to be completed at the time of assignment.** Information regarding the class, and how to register for a class, can be found using this link (https://utah.bridgeapp.com/learner/category/100).
